

1000 Masters Vocational Training Organization Nonprofit Ltd

The maintainers of the vocational training institutions of Csongrád County and Orosháza came together in late 2008 with the aim to develop a vocational education and training system that provides every student modern vocational training and guarantees a secure start of their career in the labour market. The maintainers of the institutions founded the 1000 Masters Vocational Training Organization Nonprofit Ltd with the primary task to operate the 1000 Masters Regional Integrated Vocational Training Centre.

The Vision of the 1000 Masters Vocational Training Organization Nonprofit Ltd

By the development of the vocational education and training, our fundamental goal is to increase the economic potential, to improve competitiveness and to increase the employment in the South Great Plain Region, thereby, to enhance capacity to retain employment and to reduce unemployment in the region primarily in Csongrád and Békés County.

Strategic goal of the 1000 Masters Vocational Training Organization Nonprofit Ltd

The 1000 Masters - Integrated Vocational Training Centre for the South Great Plain has the largest geographical coverage and the highest student headcount in the country. Based on efficient use of resources, restructuring the training structure and improving the quality and content of the training, the strategic goal of the project is to create a strongly cooperating institutional network that offers students real choices, prepares them for lifelong learning and for the effective participation in the labour market.

Adult Education

One of the most important roles of the **1000 Masters Vocational Training Organization Nonprofit Ltd** is to provide school-based and nonschool-based educational services. Our institution has a unique network of resources in the region, therefore, it can offer all kinds of solutions to the most specific training needs. The adult educational activities of the **1000 Masters Vocational Training Organization Nonprofit Ltd** are characterized by vocational trainings that take lifelong learning needs into consideration. Besides the provision of basic vocational education, we can offer partial and specialized build on qualifications as well, furthermore, we can organize short courses for technology introduction. The training courses are organized in the training centres or based on demand, at external locations

where well-equipped workshops are at the disposal of the trainees. Our instructors, trainers are highly qualified professionals with proven experience.

Adult education services provided for customers:

- Assessment of prior knowledge and training needs
- training and employment counseling
- career guidance and advice
- teaching job search techniques

Cooperation

The vocational organization activities aiming at the economic alignment of the region (Csongrád County and Orosháza) cannot successfully be implemented without the close professional cooperation of the maintainers, member institutions, actors of the economic sphere and organizations supporting businesses and enterprises. Our goal is to develop a professional and proactive cooperation by involving all maintainers and member institutions based on mutual benefits. Through these cooperations the task of the **1000 Masters Vocational Training Organization Nonprofit Ltd** is to coordinate the formulation of vocational concepts and their implementation, to meet the requirements of the regional labour market by adjusting the vocational education and training portfolio to the demands of the market. The determination of the development directions of the regional public education as well as the vocational education and training system takes place in accordance with the medium and long term directives and guidance of the European Union and national strategies.
